

Assessment Guide for Coastal Erosion and Flooding Risks

April '25 to March '26

£25,000

Moray Council

Overview:

The primary goal is to create a straightforward, user-friendly assessment guide for communities to identify and evaluate the risks from coastal erosion and flooding. Additionally, the project aims to provide practical measures that communities can take to mitigate these risks, ensuring that these measures are tailored for the community and its resilience partners.

What are the Project Aims:-

Simple Assessment Guide that:-

- Identifies coastal risks (e.g. rising sea levels, storm surges)
- Classifies coastal risks (e.g. erosion, flooding)
- Lists coastal assets at risk (e.g. houses, roads)
- Provides practical community measures for coastal areas
- Includes a simple Assessment Form for communities to use in assessing risks
