ABSTRACT

Coastal change data between 1970s and Modern data. The 1970s data is based on Mean High Water Spring, digitised from OS National Grid 1:10,560/1:10,000 sheets. Epoch 1956 to 1995. The Modern data is a composite of OS MasterMap MHWS data and updates from multiple surveys. Extent: Soft or Erodible shorelines. This data was analysed as part of 'Dynamic Coast' Scotland's National Coastal Change Assessment, see www.dynamiccoast.com for more info.

PURPOSE

Coastal change data between 1970s and Modern data. Field 'DIST_V' shows the change in metres between the 1970s and Modern survey. This data was analysed as part of 'Dynamic Coast' Scotland's National Coastal Change Assessment, see www.dynamiccoast.com for more info.

Data Quality Information

LINEAGE
LINEAGE STATEMENT
This data was developed as part of the National Coastal Change Assessment (see
www.dynamiccoast.com). It displays the 1970s MHWS shoreline and the field
'DIST_V' quantifies the spatial changes between the 1890s and 1970s, in metres over
that time period. For more information see methodology report on
www.dynamiccoast.com
